The Psion Teklogix Sibo SDK for Windows® CE 4.2 and CE 5.0 and provides support for programming in Sibo 'C' and OPL . This SDK is intended as a porting tools to allow for the migration of existing applications from the Workabout MX to Psion Teklogix's newer Windows® CE based terminals.

This download contains both the SIBO 'C' and the SIBO OPL migration kits compatible with any Psion Teklogix Windows CE 5.0 based terminal. Select the appropriate kit during installation.

For more information on porting existing applications see the "OplMigrationGuide.pdf" and "CMigrationGuide.pdf" that comes with this SDK.

System Requirements
